INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US05/13039**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims <u>2,5</u>	YES
	Claims <u>1,3,4,6,7</u>	NO
Inventive Step (IS)	Claims <u>2</u>	YES
	Claims <u>1 AND 3-7</u>	NO
Industrial Applicability (IA)	Claims <u>1-7</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 1,3,4 and 6 lack novelty under PCT Article 33(2) as being anticipated by Okada-2001/0025187.

Okada discloses a blood filter having a plurality of strut pairs which extend from adjacent each other near the proximal and distal ends of the filter, and extend outwardly from each other at intermediate portions. When compressed, the struts are parallel to the axis of the filter. The stent has 3 pairs of struts and is made out of nitinol.

Claims 1,3,4,6 and 7 lack novelty under PCT Article 33(2) as being anticipated by Boyle, et al.-6540722.

Boyle discloses a filter made out of pairs of struts. At the ends of the filter, the pairs of struts are adjacent each other. In intermediate sections, the struts curve away from each other. The struts go from an axial orientation to an expanded orientation. The filter is made out of nitinol.

Claim 5 an inventive step under PCT Article 33(3) as being obvious over Boyle, et al.-'722.

Boyle discloses the invention as claimed with the exception of the number of struts. It would not have involved an inventive step to have used 12 struts, as Boyle discloses in col. 23 lines 15 and 16 that the number of struts can vary.

Claim 2 meets the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the intermediate portions of each one of the pairs tends to curve away from each other and touches one of another pair of struts.

Claims 1-7 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
